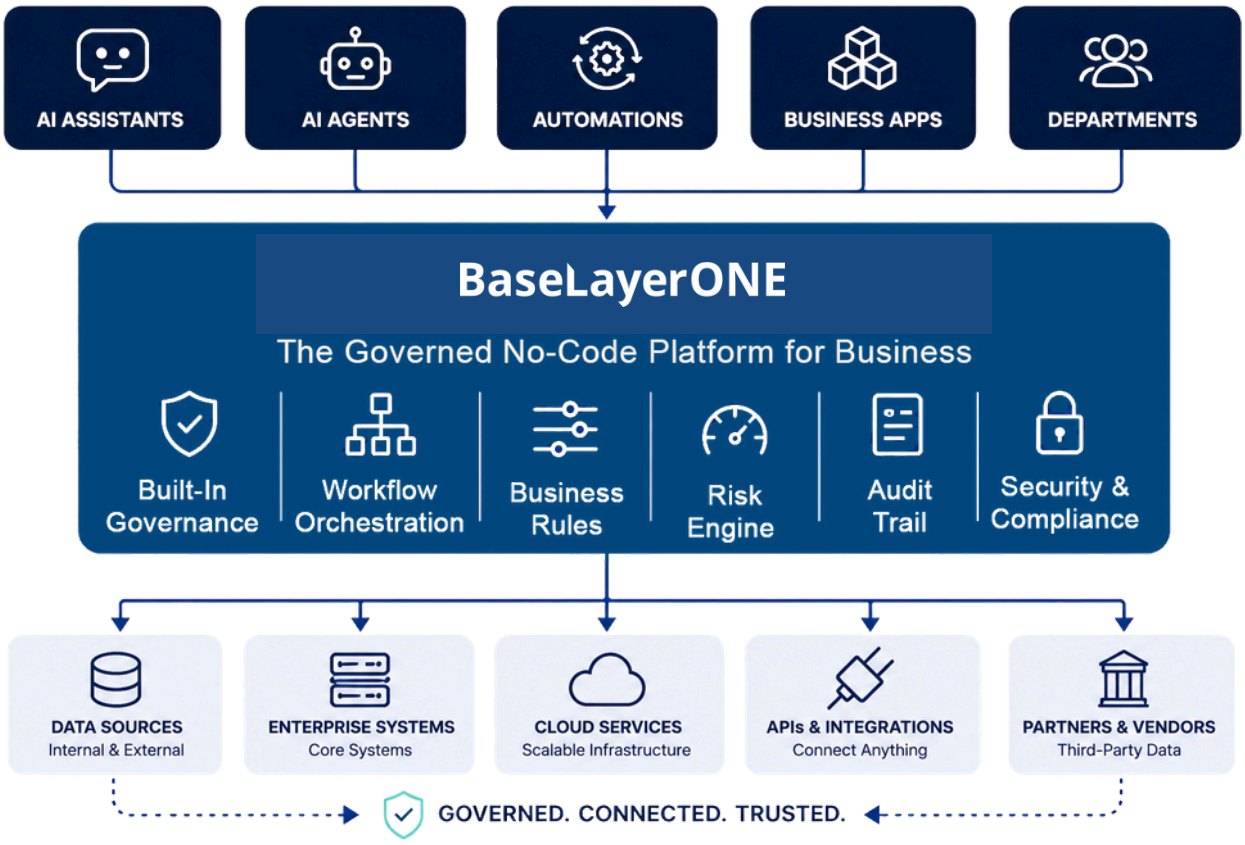
BaseLayerONE

The ***governed no-code platform***
for enterprise AI, agents, and business applications

Every AI & Agent. Every workflow. Every decision. Governed by design.

Artificial intelligence is transforming how organizations operate. Every department is adopting AI assistants, intelligent agents, automated workflows, and custom applications. The opportunity is enormous. So is the governance challenge.

BaseLayerONE gives organizations the no-code freedom to build and deploy AI-powered business applications, while ensuring every workflow, every decision, and every AI interaction operates within a governed enterprise framework.



Orchestrate and Govern AI & Agents at Enterprise Scale

Empower every team to build intelligent applications and agents while ensuring every workflow, every decision, and every interaction operates within a trusted, governed framework.

SAFE INNOVATION

Governance, controls and audit are built into every solution

FASTER DELIVERY

No-code tools put business in control- not in the backlog

REDUCE RISK

Consistent policies and rules across every workflow.

ADAPT CONTINUOUSLY

Evolve processes and policies without software projects.

Built for the way business moves

BUILD

Create AI, Agents and workflows

→

GOVERN

Apply policies and controls

→

OPERATE

Run and monitor workflows

→

ADAPT

Change workflows as needed

Governance is embedded in every workflow.

Why BaseLayerONE is different

TRADITIONAL SOFTWARE	LOW-CODE PLATFORMS	BaseLayerONE
Developer-led	Technical builders	Business-led
Software projects	Technical configuration	True no-code configuration
Long release cycles	Developer support often required	Rapid business change
Governance added afterward	Governance varies	Governance built into every workflow
IT backlog	Shared ownership	Business ownership with enterprise control

What this means for you?

Govern with confidence

Policies, approvals, business rules, audit history, and human oversight become part of every workflow.

Build without coding

Drag-and-drop agents, tools and business into workflows without creating another development project.

Adapt continuously

Evolve processes as regulations, policies and business priorities change.

Innovation moves fast.
Governance keeps it on course.

BaseLayerONE

See it in action!
